

1. POS Window

This is the main window of the entire software. When you scan a barcode it will show on the entrybox what the barcode scanned. It also has different Buttons to access different parts of the software like the Accounts, Reports, Backup & Restore, Inventory, Barcode.

Purchase Void

1.1 Checkout

In this part where we see the scanned item to be bought. It has a Purchase and Void button.

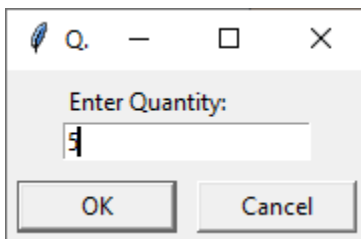

When the purchase button is clicked it will then show a new window where you need to input the customer's name, contact number, and the money given. If the money given is sufficient it will display that the purchase is successful and will then print a receipt

1.2 Quantity

When the customer is buying the same thing multiple times, you don't need to scan the barcode multiple times either. You just need to press the quantity button then it will enter the quantity to be bought then it will change the quantity on the checkout table.

1.3 Manual Input

If there is a time that the barcode scanner is unavailable, you can click the manual input button then enter the barcode manually.

Input Barcode:

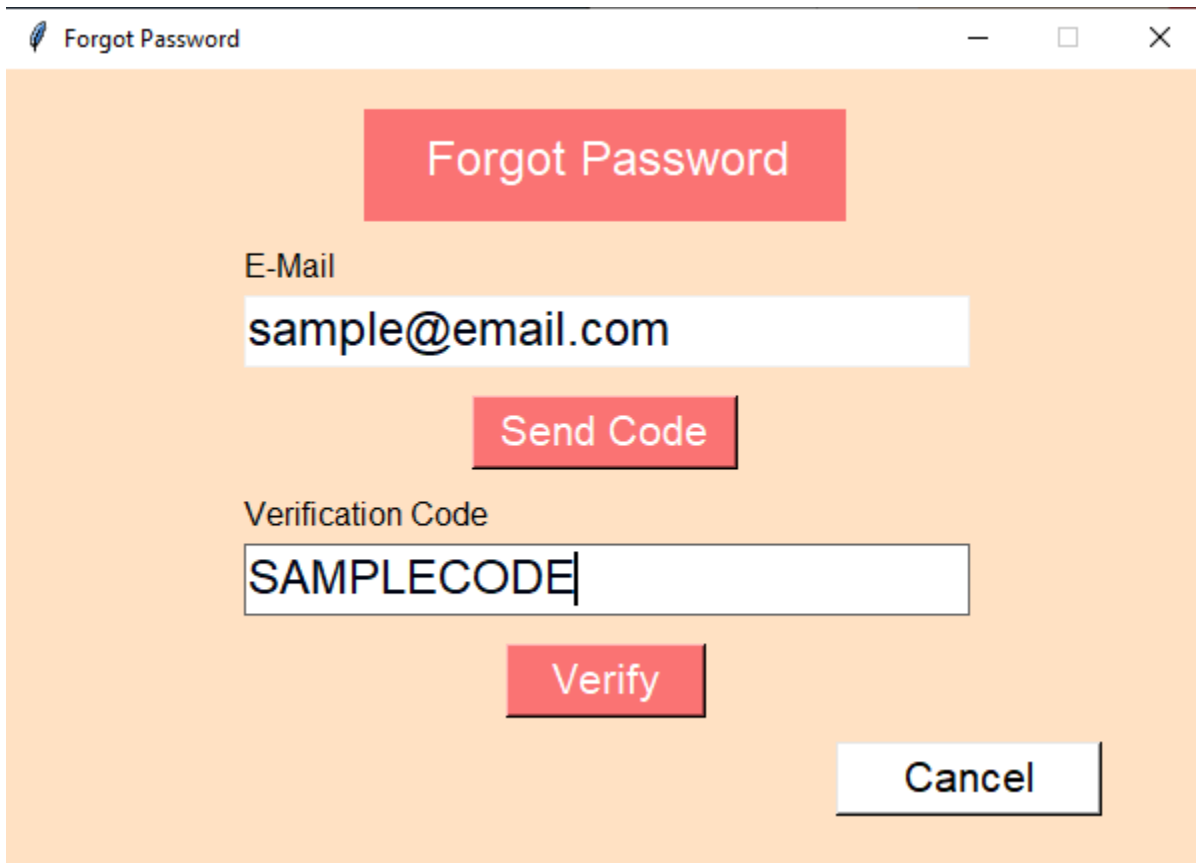

6944348527604

OK

Cancel

2. Forgot Password

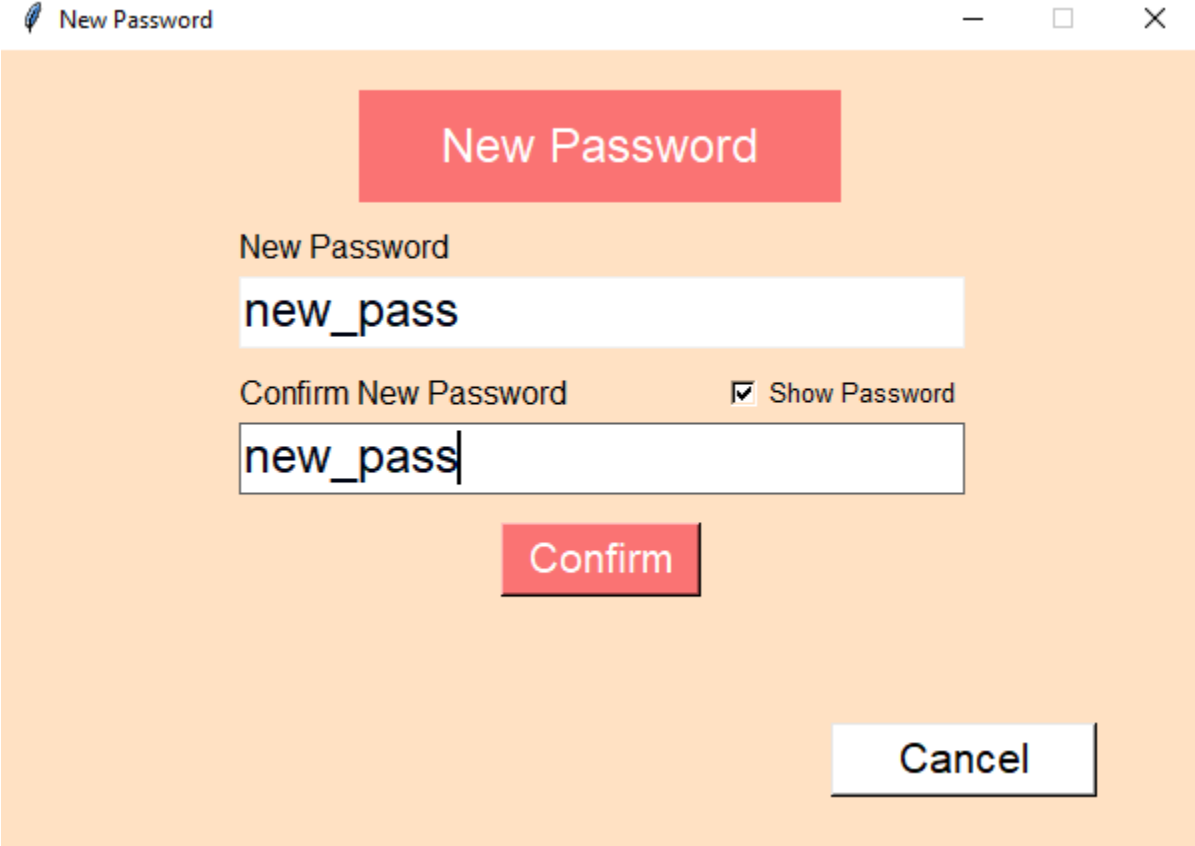

Input the email address that is registered. Then click send code. The code will be sent to the email address. Input the code from the email in the verification code entry then click verify.

The image shows a web browser window titled "Forgot Password". The page has a light orange background. At the top, there is a red button labeled "Forgot Password". Below this, the text "E-Mail" is followed by a text input field containing "sample@email.com". Underneath the email field is a red button labeled "Send Code". Below that, the text "Verification Code" is followed by a text input field containing "SAMPLECODE". Underneath the verification code field is a red button labeled "Verify". In the bottom right corner, there is a white button labeled "Cancel".

3. New Password

Input the new password you want to. Like in Login it also has the Show Password checkbox to show the password on the entry. Then press confirm if you decided for the new password.

A screenshot of a web application dialog box titled "New Password". The dialog has a light orange background and a red header bar with the text "New Password". Below the header, there are two text input fields. The first field is labeled "New Password" and contains the text "new_pass". The second field is labeled "Confirm New Password" and also contains the text "new_pass". To the right of the second field is a checkbox labeled "Show Password" which is checked. Below the input fields are two buttons: a red "Confirm" button and a white "Cancel" button with a black border. The dialog box has standard window controls (minimize, maximize, close) in the top right corner.
